

LT620

LOADTECH
LOAD CELLS

Model LT 620 load cells are designed to be used in tension on suspended batch weighing systems or crane weighing Systems.

The mounting holes are sized to fit the industry standard shackles.

MODEL LT620 TENSION LINK

- Capacities 1 000kg– 200 000kg
- Electroless nickel plated steel
- Protection to IP66
- Optional MIL spec. plug or hydraulic hose protection for cable.
- Ideal for suspended loads and crane weighing systems
- Wireless option from 20 000 kg

It is manufactured from high grade tool steel and electroless nickel plated for environmental protection.

Output is a nominal 1.5mV/V which is less than a standard load cell, but this allows for a greater safety margin in the ultimate breaking load.

It is normally fitted with a fixed 5m long cable but can on order be fitted with either a MIL. Spec. connector to facilitate removal of the cable or a hydraulic hose to protect the cable
